Institute Lecture Series

Scripps Florida hosts an Institute Lecture Series on a weekly basis. Palm Beach State College Biotechnology Students are welcome to attend any and or all lectures. This is a unique opportunity to gain exposure to the latest advances in biomedical research. Scroll down for all events this term.

RSVP 24 hours in advance:

Pat Castro 207-5055 or biotechnology@palmbeachstate.edu

Date: September 10, 2010

Speaker: **Dr. Mike Mullan** Rosekamp Institute

Subject: Dihydropyridines and amyloid lowering activity in Alzheimer Disease

Location: Building B, Auditorium

Time: 11:00 AM

Date: September 24, 2010

Speaker: **Dr. Jotham Coe** Pfizer Global Research and Development

Subject: Chemical approaches for treatment of depression, schizophrenia, ADHD and addiction

Location: Building B, Auditorium

Time: 11:00 AM

Date: October 5, 2010

Speaker: **Dr. Kurt Wuthrich** The Scripps Research Institute – **Nobel Prize Laureate**

Title: Prion-protein structural dynamics and prion diseases

Subject: Nuclear Magnetic Resonance spectroscopy for determining the three-dimensional structure of biological macromolecules

Location: Building B, Auditorium

Time: 11:00 AM

FLORIDA

Institute Lecture Series

Date: November 5, 2010

Speaker: **Dr. Bruce Spiegelman** Dana-Farber Cancer Institute

Subject: Cell differentiation, cellular metabolism, and genetic factors involved in obesity and diabetes.

Location: Building B, Auditorium

Time: 11:00 AM

Date: December 3, 2010

Speaker: **Dr. Marc Caron** Duke University Medical Center

Subject: G-protein coupled receptors and neurotransmitter transporters in normal and abnormal psychology

Location: Building B, Auditorium

Time: 11:00 AM

Date: December 10, 2010

Speaker: **Dr. Yavin Shaham** Behavioral Neuroscience Branch NIH/NIDA/IRP

Subject: Cellular and Neuroanatomical mechanisms that underlie drug addiction

Location: Building B, Auditorium

Time: 11:00 AM

Date: January 14, 2011

Speaker: **Dr. John Coffin** Sackler School of Graduate Biomedical Sciences Tufts University

Subject: Molecular biology and evolution of retroviruses

Location: Building B, Auditorium

Time: 11:00 AM
