

Position Opening

Job Title: Senior Laboratory Technician (LT)

Location: Jupiter, FL

Position Type: Full Time

Position Description:

Cytonics Corporation has an opening for a Laboratory Technician (LT).

The qualified applicant should have a Bachelors and a Masters degree from an accredited program in the life sciences field. The primary focus will be on protein-related purification, identification, and monocyte activation studies.

The applicant will work to support all research experiments for the development of protein based diagnostic and therapeutic products, will work with biologic materials using sophisticated lab test equipment and will also be responsible for material control, set up and run experiments, manage test records, and summarize lab results. The laboratory technician will be expected to understand all experiments and learn to interpret results, will follow the company's standard lab procedures and practices and make recommendations to help improve the efficiency and safety of all laboratory activities. The applicant will report directly to the Vice-President of Research and Development.

Cytonics Corporation is a leader in the development of diagnostic assays for diagnosing back and joint pain due to cartilage degeneration. Cytonics Corporation is developing therapeutic agents for back and joint pains based on our proprietary protein complex.

Qualified candidates should submit resumes to: Katie.Dent@Cytonics.com
