

Revit Classes now offered at Palm Beach State College

3D building modeling and building simulation software by Autodesk,
The maker of Autocad and Desktop/Architecture

Volume 14, Issue 1

Newsletter Date—January 2012

Special points of interest:

- *Introduction Class*
- *Intermediate Class*
- *Advance Class*
- *Easy photo realistic presentations*
- *Design several options more quickly*
- *LEED capabilities*
- *Automatic schedules*
- *Extensive detail library*
- *Built in BIM*

With REVIT software classes you can add the 'WOW' factor-

Palm Beach State College now offers 3 Classes in REVIT, Introduction, Intermediate and Advance Classes.

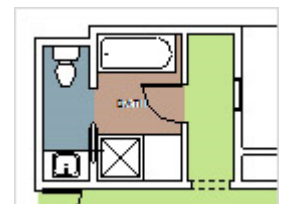

Autodesk the maker of Autocad has now released the latest upgrade of REVIT 2010 with an improved inter face. It is now easier to use with better photo realistic capabilities.

You can now develop more design solutions quicker in high presentation quality.

Develop and study multiple simultaneous design alternatives to make key design decisions. Present multiple schemes to your clients easily. Substitute each option into the model for visualization, quantification, and other data analysis to better inform decision making. LEED capabilities– Track

recycled materials, Energy use, Sun shading and interior day lighting, water use and other sustainable elements.

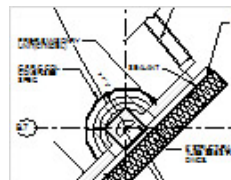

REVIT can do more in less time-

Schedules are just another view of the Autodesk Revit Architecture model. A change to a schedule view is automatically reflected in every other view or plan.

014	STUDY RM.

Take advantage of the extensive detail library and detailing tools that are part of Autodesk Revit Architecture 2010. Presorted to align with the CSI format, detail libraries can be tailored to accommodate your office.

Calculate detailed material quantities with this new tool. Appropriate for sustainable design and checking material quantities in cost estimates, Material Takeoff facilitates the tracking of material quantities.
