Confined space rescues can be technically challenging due to the environment in which they occur. This unique program stresses teamwork and covers the responsibility to identify a confined space and be familiar with various regulations, safety procedures, equipment, techniques and personnel necessary to operate at a confined space emergency. Participants who successfully complete this course will receive a FLUSAR certificate for Confined Space Technician Level.

Prerequisite: Successful completion of Rope Rescue operations class.

Textbook required, available in Palm Beach State College Bookstore: Confined Space and Structural Rope Rescue ISBN #13: 9780815173830
