## Green Stream Mapping

TIO 0491

8 hours

\$259.56

During this one day class, the participants will be introduced to the tools that can help them analyze where their organization stands on the Green Continuum. Through the use of the Green Lane Map, participants will learn how to map their own organizations, and how to identify green opportunities along their individual value streams.

### Course Contents

- History of Lean and Green
- Conventional Waste versus Green Opportunities
- Value added versus Non value added
- Non value added Green Challenges
- Value Stream Mapping versus Green Stream Mapping
- Green Lane Map creation – Current state
- Process Improvement
  - Water efficiency and contamination, energy and atmosphere, materials and resources, indoor environmental quality, innovation in design, collection of environmental metrics
- Kaizen process
- Green Lane Map creation – Future state
- Green planning for the future
  - Part of the strategic plan
