Bachelor’s Degree Programs at Palm Beach State College

Your bachelor’s degree from Palm Beach State will deliver long-term value and give you the knowledge and skills employers need today!

Our programs are affordable, flexible and student-focused.

All programs are offered almost entirely online, allowing 24/7 access to dynamic, multimedia coursework. Each degree features a culminating independent project known as the Capstone Experience, in which students investigate and apply what they’ve learned to a relevant topic. Full-time students can complete their bachelor’s program in 18-24 months. In this short amount of time, you could be well on your way to a brighter future!

Entry Requirements:

The Bachelor of Applied Science programs are open to those who have an associate degree or a minimum of 60 equivalent college credits. A minimum 2.0 grade point average is required. (See our website for details.)

The Bachelor of Science in Nursing program is designed exclusively for licensed RNs with an associate degree or diploma.

The Certificate of Professional Preparation in Project Management is for individuals who already have a bachelor’s degree or higher.

If you haven’t attended college yet, learn about our associate degree pathways on our website.

Bachelor of Applied Science

Concentration Areas

General Management
Coursework encompasses operational decision making, customer relations, organizational behavior, marketing and more. You’ll solve authentic business problems throughout the program, and you can customize your degree with elective courses in entrepreneurship, business ethics and stakeholder management, or international business. There are also internship opportunities available within the local community.

Entrepreneurship
Examine the concepts, strategies and case studies in planning new ventures, while paying attention to the practical aspects of developing a business and raising funds. Plus, you can tailor your degree through elective courses in venture finance, advanced business planning, starting and managing a small business, risk management, and business ethics and stakeholder management.

Health Management
Courses cover everything from health care facility administration to operational decision making, health care legislation, and epidemiology as it pertains to health service planning. Choose from electives in principles of managed care, ethics in health care, and health care marketing, as well as the opportunity to explore special interests.

Project Management
You’ll master the principles, tools and methodologies of project management, from initiation, planning and execution to monitoring, controlling and successful completion. In addition, you may choose from elective courses in change management, scheduling and cost control for IT projects, and managing IT integration.

Go Beyond Your Bachelor’s
Certificate of Professional Preparation
Project Management
Gain project management expertise to further your career.
This 100% online certificate covers:
- All knowledge areas in the Project Management Body of Knowledge (PMBOK®) project integration, scope, time, cost, quality, procurement, human resources, communications and risk management.
- All phases of a project life cycle from initiation, planning and execution to monitoring, controlling, and close-out.
- Competencies for several certifications including the Project Management Institute’s Certified Associate in Project Management (CAPM)® and Project Management Professional (PMP)®.
Employers look for and value PMI certification.
