These non-credit continuing education courses prepare students for the Water and/or Wastewater Level “C” State of Florida license. Level “C” is offered in three parts of 54 hours each. Students must complete in order: Part 1, Part 2 then Part 3. Upon successful completion of all three parts, students will be qualified to sit for the ”C” State License exam.

An important segment of these courses provides operators information on overall plant operation and covers topics such as daily operating procedures, regulation of flows, chemical use and handling, records and reports, plant maintenance, emergency conditions and procedures, handling complaints, and energy conservation. The Department of Environmental Protection (DEP) has approved these continuing education courses.

Acquire a license to safely and effectively operate and maintain water and/or waste water treatment plants. Job opportunities are available working with counties, municipalities and private companies throughout Florida. Most offer full-time employment with benefits.
