### Basic Traffic Homicide Investigation

#### Course Description

The student will be refreshed on their duties and responsibilities at the scene of a crash. The student will learn how to identify evidence found on the roadway and from the vehicle. An introduction to some of the essential mathematical calculations and physical laws will be given. Also, the student will learn how to measure and diagram and how to use photography and video to document the scene. The student will also participate in practical exercises involving measuring and diagramming.

#### Course Topics

- Physical evidence from the roadway
- Physical evidence from the vehicle
- Frictional forces and acceleration
- Determining speeds from skid mark evidence
- Crash scene photography
- Methods of measuring crash scenes
- Diagramming scenes and use of traffic templates
- Case preparation

#### Salary Incentive

This course qualifies for 80 hours of Salary Incentive Credit by the FDLE Criminal Justice Standards and Training Commission for law enforcement attendees only.

#### Course Details

##### Prerequisite(s)

To attend this training, the participant must be a Florida law enforcement officer whose duties include the investigation of traffic crashes or support of crash investigators. There are no additional requirements, but an aptitude towards mathematics and science is desirable.

##### What should I bring?

All materials for classwork will be provided for this course. Please bring any measuring equipment for outdoors projects (Survey type equipment not needed)
