FOR IMMEDIATE RELEASE

Rogers appointed dean of health sciences and occupational programs at PBCC in Lake Worth

(Lake Worth, Fla.—June 25, 2004) Jacqueline Rogers has been named dean of health sciences and occupational programs at Palm Beach Community College in Lake Worth.

Rogers has served as associate dean for health sciences since 2002, overseeing the Institute for Health Sciences and all medical programs throughout the College.

In her new position, effective July 1, she will continue to oversee the medical programs as well other programs, including dental, hospitality, apprenticeship, trade and industrial.

Her promotion is part of an overall restructuring of the duties and, in some cases, positions of PBCC's administrative team.

"We're bringing together the programs that provide employment immediately upon completion," Rogers said. "Our past successes with bringing together all of the medical programs has demonstrated the benefit of having one person oversee them. That model can now be applied to other occupational programs."

A resident of suburban Lake Worth, Rogers began her career at PBCC in 1993 as an adjunct instructor teaching courses in pediatric and newborn critical care, nutrition and exercise physiology, flight physical principles and EKG interpretation. After two years of part-time teaching, she was hired as a full-time professor in 1995. Two years later, in 1997, she was appointed to chair the Respiratory Care Department. Prior to coming to PBCC, she worked as clinical coordinator of education for Good Samaritan Medical Center for 15 years.

Rogers holds a bachelor's degree in human resource management and a master's degree in human resource development from Palm Beach Atlantic College.
