SCHOLARSHIPS & FINANCIAL ASSISTANCE
Bridging the Gap Between Ambition & Achievement
About this Report

The Palm Beach State College President’s Report examines issues of importance related to the education of today’s students for tomorrow’s world. Our last issue explored how Palm Beach State is helping meet the demand for smart, skilled, and compassionate healthcare practitioners in all disciplines, and how the most advanced simulation tools and technology are supplementing hands-on clinical training to expand student experience.

This issue explores how scholarships and other forms of financial assistance bridge the gap between academic desire and economic reality for most students, and how relieving some of the burden of cost helps students succeed in both the classroom and the community.

Your comments and suggestions are welcomed and appreciated. Please address them to:

A Conversation with the Palm Beach State Family

The President’s Roundtable

We are introducing an occasional new feature with this edition of the President’s Report. Called The President’s Roundtable, it seeks to broaden understanding and build bonds between executive leadership of Palm Beach State College and the students we serve. Participants represent the broad spectrum of Palm Beach State students. Because of space limitations this is an edited version. The production was recorded in the office of President Ava Parker on March 15, 2022.

For the complete video please visit the Palm Beach State College website at tinyurl.com/2p8tb3u7.

From left to right introducing the “Roundtable” discussion members:

- Lorena Martin Reyes: An international student pursuing an associate degree at PBSC
- Tarruck Wheeler: Honors Student Advisory Council President and Computer science major
- Dr. Peter Barbatis: Vice President for Student Services and Enrollment Management
- Ava L. Parker, J.D.: PBSC President
- Brenda Martinez: Student in the Crime Scene Technology program

President Ava Parker: It is such a pleasure to have you all here. While we know how important it is to have direct, two-way communication with the students we serve, the reality is that the day-to-day activities of my job too often get in the way. So, we came up with the idea of a Roundtable conversation like this in the President’s Report. The goal is ensuring that meaningful dialogue happens on a regular basis. This does not, of course, replace one-on-one conversations whenever opportunities present themselves—I, for one, really enjoy those casual encounters at the cafeteria or around the campuses. Let’s start by introducing ourselves.

Mr. David Rutherford: I am Vice President of Institutional Advancement. That includes the Foundation, the arm of the college that raises financial support for the college and students like yourselves.

Dr. Peter Barbatis: I’m Vice President for Student Services and Enrollment Management. Those two services work together to ensure we are doing everything we can to support our students’ success and meet our enrollment goals. It’s a pleasure to be with you and to be able to serve as your advocate at the President’s Cabinet, a group of senior managers who meet regularly with President Parker. I believe she can attest to the fact that anytime we talk about decisions, I always bring up the student perspective, and what we can do to ensure the experience is a positive one.

Ms. Brenda Martinez: I am a student here at Palm Beach State College. I am currently taking classes in the Crime Scene Technology program. Once I complete the program and get my degree, I plan to apply to multiple sheriff’s departments as a crime scene investigator. After getting field experience I’d like to move to a big city and become a crime scene investigator there. I would eventually like to be a forensic psychologist, but for now I like the idea of being at the scene, taking photos, and collecting evidence.

Ms. Lorena Martin Reyes: I am an international student from Madrid, Spain. I am taking classes to graduate with an associate degree, after which I am planning to transfer to a world-recognized institution for business, majoring in international business. After getting my bachelor’s degree I would love to travel around the world, get to know people, learn about other cultures. I am super happy to be here. Thank you so much for this opportunity!

“I think that education is the most powerful tool we can have as human beings.”

Lorena Martin Reyes

President Parker: And we are happy to have you here!

Mr. Tarruck Wheeler: I’m a non-traditional student (outside the usual 18-25 age range), and I’m president of our Honors Student Advisory Council. I am a computer science major with a focus on cybersecurity. After matriculating to another university and graduating, I hope to work internationally, or possibly at the United States State Department or an NGO. I’d like to be a philanthropist and help people obtain sustainable housing and gain literacy with technology, as well as using technology to improve food production and education. That’s my end game.

Mr. Rutherford: What excites you most about the future?

Mr. Wheeler: I think the possibilities are endless, because we can always grow, and accomplish anything we want—especially with a good education. As long as that education is available to all of us, I believe the future is bright and we can accomplish anything.

Mr. Rutherford: How about you, Lorena? What excites you about the future?

Ms. Martin Reyes: I think that education is the most powerful tool we can have as human beings. By working on our education, we grow as individuals, we can achieve whatever we want and make our dreams come true.

Ms. Martinez: I’m excited to get out there in the real world after being sheltered for so long in West Palm Beach! Palm Beach State has offered me so many opportunities, chances to make friends with people who like the same things I do, study together, and just hang out.
Mr. Rutherford: It’s so energizing to hear your perspectives on the future and the fact that in your eyes the future is so bright. We believe in the same things, even though we are not in the same age category. It’s always energizing to hear the optimism that you have for the future.

Ms. Martin Reyes: My dream has always been to attend higher education in the United States. I don’t know where I will finish my education, but I know that Palm Beach State College is the key to my future. This is where I am starting the work for my future.

Mr. Rutherford: You may think this is a dangerous question to ask, but it is one that President Parker loves to ask students because we really aspire to find out from you what we are doing well and how we can get better. Let’s start with what we are doing well.

Ms. Martin Reyes: The tutoring centers and libraries – I love them so much! Especially the quiet rooms and quiet sections of the libraries. The tutors are great! Sometimes I don’t want to ask the professor and often things online don’t explain it well.

Mr. Rutherford: Anything we could improve on?

Ms. Martinez: Longer library hours? But I know people have to go home sometime!

Ms. Martin Reyes: I really like the library, and the fact that Palm Beach State College has a lot of free student resources, such as the counseling center. I found that to be very supportive. As an International Student I would like to add one thing. I struggle with the cost of college. I understand that FAFSA (Free Application for Federal Student Aid) is generally available only to United States citizens. I wish there was some other forms of financial assistance.

Mr. Rutherford: Please come by the Foundation office and we may have some suggestions, Tarruck, in your role as Student Trustee, what do you see as things we are doing well and ways in which we can improve?

Mr. Wheeler: An amazing takeaway that I gained from the Trustee Conference in Washington was that we got to hear from the Secretary of Education, Secretary of Labor, and First Lady Dr. Jill Biden. From listening to them, and hearing from Student Trustees from many other colleges, Palm Beach State is doing a lot of things very, very well. For example, during the COVID shutdown we were the only college I spoke with that provided funds directly into student accounts. Also, we were the only community college in which the president led creation of a response team. Our mental health services were there for our students, as were our tutoring services. I wouldn’t have been able to get the grades that I have without those services.

President Parker: What’s great about Palm Beach State is that we have a balance between students who have jobs while going to school, so we make that work, and others who are fulltime. What we find with those who work and go to school is sometimes the work takes over, they take on more hours and drop out that semester with the full intention of coming back. Some never come back, never achieve that goal of getting a college education. We encourage people to go full time or make the job secondary to their education. We think that’s better for them to achieve their goals.

Ms. Martinez: Mine are face-to-face, online, or both?

Ms. Martin Reyes: I try to take in-person classes, because as an international student I wanted to get the whole experience and get to know more students. Right now, I’m taking two classes in person and two classes hybrid. It’s working well.

Mr. Wheeler: My first semester was all in person, which was fantastic. But now I prefer live online. I love the modality and flexibility of online classes. You’re at home, you have your computer in front of you so you can search and get more information. It’s very intimate – we have a class where there’s eight of us on Zoom. We share our screens, chat with each other, help each other. Very interactive. And when we sign off, we are comfortably at home!

Mr. Rutherford: Are there any other things you would like to learn from your students, President Parker?

President Parker: Sure. How many of you work while going to school?

Ms. Martinez: I’m working.

Mr. Wheeler: I work for my father’s business, and I am also a fulltime father. That keeps me busy!

Ms. Martin Reyes: I’m a fulltime student.

President Parker: Thank you all so much! In closing, I would like for this exercise not to be seen as just an interesting hour together, but more as the start of a conversation. When you think of things, please share them with us. As you encounter issues like classes that you wanted to register for that weren’t on the schedule, please let student services know. We may not be able to fix it right away, or in some rare cases we may not be able to change it at all, but at the very least we will consider it.

So, know this. You have a voice. And know that we care about you and your success. Know that we are a resource. Palm Beach State College is not just a place for you to go to class. It is a place where you live and grow and develop relationships. Because you are not just a student here – you are part of a family.

“During the COVID shutdown we were the only college I spoke with that provided funds directly into student accounts.”

Tarruck Wheeler

Federal Student Aid) is generally available only to United States citizens. I wish there was some other forms of financial assistance.

Mr. Rutherford: Please come by the Foundation office and we may have some suggestions, Tarruck, in your role as Student Trustee, what do you see as things we are doing well and ways in which we can improve?

The President’s Roundtable | 5
Scholarships & Financial Assistance: Bridging the Gap Between Ambition & Achievement

Over $80 million per year in financial assistance and scholarships. The money is here for students who apply for it.

The application process can seem overwhelming, but free help is available at all five of our campuses. Some basic information is also in the accompanying article, “The Buck Starts Here.”

Dr. Peter Barbatis

In addition to state and federal financial assistance, generous individuals, foundations, and corporate entities, some featured in this magazine, sponsor scholarships through the Palm Beach State College Foundation. “Every dollar spent on scholarships comes back to society many times over,” said David Rutherford, vice president of institutional advancement and executive director of the foundation. “It is an investment in one that benefits all.”

During the 2021-22 academic year the foundation awarded 1,595 scholarships. Included in that number are some students who were brought to the United States as children of undocumented immigrants. Under the President Obama-era program known as DACA (Deferred Action for Childhood Arrivals), these students attended local public schools but because they are not US citizens or eligible non-citizens, they are not eligible to apply for federal or state financial assistance. Under current Florida law, DACA students who attended public primary schools for two years or more are, however, offered in-state resident tuition rates. Some of these students, like many others, still need financial assistance, often provided by the scholarships from gracious donors to the Palm Beach State College Foundation.

“We are fortunate because most of our donors live locally so they can see what we are doing for students and the community,” Mr. Rutherford added. “In addition, because the cost of attending Palm Beach State College is so low compared to other state schools, we offer donors great value and impact. Three credit hours here cost $303. Those same three credit hours at some other institution could cost $600. So, the donors’ dollars go twice as far.”

And here’s the best part.

Over the last three years Palm Beach State has awarded more than $80 million each year in financial assistance and scholarships.

65-70% of PBSC students receive financial assistance

About 8% receive one or more scholarships

81% of those scholarships are provided by PBSC; 19% by outside organizations

Palm Beach State has over 200 scholarship funds

1,595 scholarships awarded 21-22 academic year

...and again, it’s FREE.

There are just three things that students who are US citizens or documented residents need to know about getting Financial Assistance to attend Palm Beach State College:

1. It all begins with FAFSA, the FREE Application for Federal Student Aid.
2. Then the student completes the Palm Beach State College application.
3. There are offices full of smart, friendly people on all Palm Beach State campuses eager to help students through every step of the process – and again, it’s FREE.
Florida Power & Light Company & Palm Beach State College: Long-Term Partners Investing in Tomorrow’s Leaders

When today’s Palm Beach State College was founded in 1933, Florida Power & Light likely provided its electricity. In the decades that followed, relationships between Florida’s first public community college and what is now the largest energy company in the United States, were formed and grew to directly benefit today’s students and the communities the company serves.

“It often begins with the question: How can we align to support our mutual goals?” explains Whitney Cunningham Walker, Senior Community Relations Specialist at Florida Power & Light Company, a subsidiary of NextEra Energy. That simple question has led to a myriad of partnerships over the years – including scholarships and other forms of financial assistance – to groundbreaking work today addressing issues of equitable and diverse workforce development. “Students can get scholarships – that’s fantastic – but the conversations we’re having with President Parker and other educational leaders show that it takes more than just tuition support – it takes wrap-around services to address the needs of the entire student.”

Two PBSC programs with scholarships and enhanced wrap-around services are Electrical Power Technology and Engineering Technology, two-year degree programs. In addition to providing financial support for tuition, they offer students access to advisors to help navigate classroom settings and encourage a sense of belonging, research on the efficacy of service models, and real-world connections including mentorship and job readiness exposure.

Florida Power & Light recently gave a $800,000 grant to Palm Beach State College to enhance those programs and further the equitable workforce development goals, particularly in the Science, Technology, Engineering, and Mathematics (STEM) fields which will provide career opportunities of the future. To ensure ongoing sustainability, the grant also includes a scholarship endowment in perpetuity for tuition and wrap-around expenses for eligible students.

“You must have conversations – listen to each other – find out what the organization needs and what the students need.”

Whitney Cunningham Walker

Scholarships:
Investing in Students – Impacting Lives

A Palm Beach State scholarship is truly a gift that gives back and pays forward. If you are a resident of Palm Beach County, you have most likely crossed paths with a Palm Beach State graduate. Scholarships allow students to become the medical professionals treating our healthcare needs and the emergency responders keeping us safe every day. In fact, over 80% of Palm Beach County’s first responders receive their education and training at Palm Beach State College while a 95% job placement rate in health sciences is made possible through scholarships and philanthropic giving.

Scholarships do more than cover tuition; they impact lives – mine and yours. By investing in today’s students, we are investing in community, business, the arts, an equitable education and workforce, and, most importantly, each other. Equipping today’s generation with solid academic and professional paths helps unite college and community, driving the economic and cultural advancements of Palm Beach County through students, thriving in their fields of study, faculty, guiding them with expertise and passion; and donors, believing in the College’s mission to transform lives and strengthen this community.

Since 1973, the Palm Beach State College Foundation has been serving students through scholarships, awarding over $6 million in student scholarships over the past four years. These scholarships mean our young people can pursue careers that benefit not only themselves and their families but also Palm Beach County, enhancing the future for all of us.

Generations of Compassion & Commitment

Danielle H. Moore’s philanthropic and public service roots run deep. Her 70-plus-year heritage dates back to her step-grandfather, Montana oilman Philip Fortin. Her compassion was embellished by her grandmother, Mary Alice Fortin, and nurtured by her mother, Lesly Smith. Mrs. Moore’s stepfather, Earl E.T. Smith, former ambassador to Cuba, introduced the family to local politics when he served as mayor of the Town of Palm Beach from 1971-1977; her mother continued the legacy, serving as Palm Beach mayor from 2000-2005. Mrs. Moore accepted the mayor’s gavel in 2021.

In the tradition of three generations of strong, compassionate women, Mrs. Moore is also president of the Mary Alice Fortin Foundation. Through it and her personal drive, commitment, and charisma, she has advanced the good work of the foundation and its founders.

Palm Beach State College has been a beneficiary of the foundation and its leaders for decades, mostly in support of scholarships. The college and its emphasis on training for productive careers fits well with Philip Fortin’s philanthropic perspective. “We want to help you, because everybody needs a hand once in a while,” Mrs. Moore explained. “But you have to be making progress towards self-sufficiency.”

Bestselling Author James Patterson’s Passion for Education

Palm Beach resident and the world’s bestselling author, James Patterson, is known not only for his books but also for his steadfast support of literacy and education. The Patterson Family Foundation awards scholarships to students at colleges and universities around the country and expanded its generosity to Palm Beach State after Patterson was formally introduced to the school in 2019. Learning about the state’s oldest public community college, he felt compelled to help. “Palm Beach State College has an impressive track record in molding students into becoming future leaders, and our scholarships help continue that legacy,” Patterson said.

The Patterson’s foundation funds twenty fulltime scholarships, awarded annually to incoming PBSC students. While eligibility favors students expressing interest in careers in education, scholarships are available to other students as well.

“Encouraging community college students to pursue their dreams and create new ones is fundamental to building a diverse, thoughtful, and literate society,” Patterson said.

“Having James Patterson as a scholarship supporter of Palm Beach State speaks volumes about the progress we have made in elevating Palm Beach State to a level never before seen in the community college landscape,” said President Ava Parker. “Mr. Patterson now has a vested interest in what we are doing to further the academic mission of the College.”

“Encouraging community college students to pursue their dreams and create new ones is fundamental to building a diverse, thoughtful, and literate society.”

James Patterson

HCA Healthcare and Palm Beach State: Expanding Decades-Long Partnerships

HCA Healthcare is one of the nation’s largest providers of healthcare services, with eighteen hospitals in south Florida. Three are in Palm Beach County – the largest, JFK Medical Center, is just a stone’s throw from the Palm Beach State Lake Worth campus. So, it’s no surprise that The Community’s College has a decades-long relationship with the healthcare powerhouse.

That relationship recently grew with the addition of HCA Healthcare’s Associate Vice President for Community Engagement, Ellice Martinez, to the Palm Beach State College Foundation board of directors. “I believe there will be increased opportunities to see what Palm Beach State needs in the health sciences world, and what we can provide,” she said. “That could include additional monetary support for scholarships and technology, as well as increased access to our hospital network for students’ clinical work.”

Ellice is no stranger to PBSC. A second-generation south Floridian, she took the majority of her classes at Palm Beach State while enrolled at Florida Atlantic University. “I really enjoyed my time here. Classes were smaller so professors could be more attentive; student life a little less pressured.” After graduation she joined the advancement department at Broward Community College, remaining there for thirteen years before joining HCA.

Ellice is not the only HCA Healthcare executive serving in voluntary positions at Palm Beach State. “Suzanne Bertsch-Gibson is our chief nursing officer and serves on the college’s nursing advisory board,” Ellice explained. “She is a tremendous advocate who makes sure Palm Beach State gets the attention it deserves.”

Regarding future scholarships, Ellice said, “While we are focused on the current nursing shortage, we know that all allied health programs need skilled, compassionate, and motivated medical staff. We like to bring people into HCA Healthcare as a patient care technician or respiratory therapist and invest in them to go back to school to earn more credentials, increasing their skills and upward mobility. We also want to match the student’s needs with our needs for recruitment. It doesn’t do anyone any good to invest in scholarships unless there are well-paying jobs available.”

“I believe there will be increased opportunities to see what Palm Beach State needs in the health sciences world, and what we can provide.”

Ellice Martinez

“I know the transformative effect that a good college education can provide for you. I have witnessed it with my own family.”

Van Williams

“On in 2” Scholarship Program

Matches Golf & Philanthropy

Golfing great Jack Nicklaus once said, “Pursue what you love, what you are passionate about.” That sums up the latest project of Palm Beach State College Boca Raton campus provost and dean of student services, Van Williams. An Army veteran with twenty-four years of higher education experience, Van is passionate about helping young people go to college. He is also passionate about golf. Twice a week, at least. “Why not,” he thought, “bring my two passions together.”

Van knew that the biggest obstacle for many people considering college is money. And, as an avid golfer as affable as Van, he has a large group of friends.

So he started talking with his friends about his idea: create a scholarship fund for local people to attend Palm Beach State College to earn their two-year degree or certificate, both of which can open doors to meaningful careers. Having experienced college, some may decide to continue their education toward advanced degrees.

He asked one hundred friends to contribute $100 a year to the scholarship fund. That $10,000 annually will go a long way. The sales pitch was easy: skip one golf outing a year. The money saved from course and cart fees, lunch or dinner, would easily cover the $100 annual contribution.

So far Van has signed up sixty-five contributors. “No question I’ll get to a hundred,” he promises.

The name of his new organization? On in 2. In golf, that means you get on the green in two shots from the tee. In student life, it means that 2-year degree will get you ON the path to a transformed future.

“I know the transformative effect that a good college education can provide for you. I have witnessed it with my own family.”

Van Williams

Several supporters of the On in 2 scholarship fund: Julia Sanchez, Roy Vargas, Van Williams, Jerry Spielman, Natacha Nettles, Germany Dixon, and Christine Belyeu.

Several supporters of the On in 2 scholarship fund: Julia Sanchez, Roy Vargas, Van Williams, Jerry Spielman, Natacha Nettles, Germany Dixon, and Christine Belyeu.
Pia Giannone is the embodiment of the Rotary Club of Boca Raton’s slogan, “Changing Lives, Building Futures.” She credits the club, which she joined in 2013, with changing her own life and helping her find new meaning and passion through the club’s scholarship program.

“I was amazed to learn that the club started its scholarship program in the 1990s,” said Pia, who now co-chairs the Rotary Club’s scholarship and mentorship committee. In the last seven years, the club has awarded over $163,000 in scholarships to Palm Beach State students. Since the program began, over four hundred students have received Rotary Club scholarships valued at over $1.5 million.

“Palm Beach State is an ideal partner for our program. It is a part of the community, giving people the opportunity to attend college and to succeed!” Working closely with the Palm Beach State College Foundation, we created traditional scholarship awards as well as ‘career’ scholarships directed to students learning trades that can lead to rewarding jobs in heating and air conditioning, marine industries, and auto and diesel mechanics.” Rotary Club scholarships also benefit students in Palm Beach State’s emergency medical and fire services. “Our communities rely on these graduates to keep us safe.”

Since the program began, over four hundred students have received Rotary Club scholarships valued at over $1.5 million.

“Barry Florescue was a prominent and extremely generous businessman in south Florida whose primary missions were Junior Achievement and Boys and Girls Clubs,” she explained. After his death in 2017, Pia suggested that the board of directors of his family foundation create an endowment at Palm Beach State to continue giving a hand up to those he helped in their younger years. The Florescue-funded endowment now has assets over $100,000.

Because of Palm Beach State and the generosity of people like Pia Giannone, the Rotary Club of Boca Raton, and the Florescue Family Foundation, local students have the opportunity to attend college, live, and work close to home and family.

Just outside Industrial & Technical Program Director Eligio Marquez’s office stands a row of massive diesel engines on big, movable dollies. Outside is a huge, shiny white semi-truck, the kind that pulls long trailers. Next to that is the front end of a school bus and a fire-rescue ambulance that’s seen better days. These, plus rows of automobiles on lifts and boats and motors on trailers in clean, orderly garages are the hands-on teaching tools of future technicians who keep America moving.

“Automotive/diesel and marine, plus heating, ventilation and air conditioning (HVAC) and Career Certificate Programs (CCP) at Palm Beach State, the gateways for students to apply for good jobs in their field of study,” Mr. Marquez explained. “Certificates generally take about a year to earn, a little less for those attending night classes. Conservatively, about ninety percent of our certificate students find local employment with entry-level pay between $15 and $25 per hour.”

What’s more, the Rotary Club of Boca Raton has a special scholarship program for students in these skilled trades. “A total of six Rotary Club scholarships per year are awarded, split between automotive/diesel, marine services, and HVAC programs,” he explained.
Felipe Julio’s path to an Associate Degree from Palm Beach State College was anything but easy. Born in Brazil, he came to the United States with his undocumented parents in 1999, at age eleven, settling in south Florida where he attended elementary, middle, and high school. “I did fairly well in high school, until I hit a rebellious phase in my junior year,” he said. “I got upset with life – I just didn’t care and failed a bunch of classes that year.”

He credits his mother for turning his life around. “My mom had instilled in me the drive to be my best, and that finally kicked in.” By the time he entered his senior year in high school, he was back in high gear, got straight A’s.

He graduated from high school in 2007, and a new reality struck him. Even though he had attended local public schools since he was eleven, because he was undocumented, he was ineligible for federal financial aid. To make matters worse, without papers he was ineligible for in-state tuition rates at that time. The costs were prohibitive. So, he went to work.

In 2013, he thought his college dreams had finally come true when former President Barack Obama signed into law the Deferred Action for Childhood Arrivals act. DACA certificate in hand, Felipe went to the PBSC admissions office, only to learn he would have to pay out-of-state tuition rates because the state did not recognize DACA as residency.

Felipe began classes at Palm Beach State in 2018. His first class was intermediate algebra. While he was nervous about having been out of school for so long, his professor said he had a talent for math, and suggested he help other students by working in what is today called PALS (Panther Academic Learning Support). “It’s tutoring, but you work in the classroom alongside the professor, assisting students from that class. It’s a great program,” Felipe explained.

Fourteen years after graduating from high school, Felipe R. Julio graduated from the Honors College at Palm Beach State with a 4.0 GPA. Today he is a fulltime junior at Florida Atlantic University on a scholarship and financial assistance.

He graduated from high school in 2007, and a new reality struck him. Even though he had attended local public schools since he was eleven, because he was undocumented, he was ineligible for federal financial aid. To make matters worse, without papers he was ineligible for in-state tuition rates at that time. The costs were prohibitive. So, he went to work.

In 2013, he thought his college dreams had finally come true when former President Barack Obama signed into law the Deferred Action for Childhood Arrivals act. DACA certificate in hand, Felipe went to the PBSC admissions office, only to learn he would have to pay out-of-state tuition rates because the state did not recognize DACA as residency.

Felipe began classes at Palm Beach State in 2018. His first class was intermediate algebra. While he was nervous about having been out of school for so long, his professor said he had a talent for math, and suggested he help other students by working in what is today called PALS (Panther Academic Learning Support). “It’s tutoring, but you work in the classroom alongside the professor, assisting students from that class. It’s a great program,” Felipe explained.

Fourteen years after graduating from high school, Felipe R. Julio graduated from the Honors College at Palm Beach State with a 4.0 GPA. Today he is a fulltime junior at Florida Atlantic University on a scholarship and financial assistance.
