#### FA - Possible Financial Aid Action Warranted

Once quorum was reached, Michele Tiggle, 2016-2017 Chair of the committee brought the meeting to order and asked all members in attendance in person and on the conference call to introduce themselves.

**Welcome**–Acting Dean of Curriculum & Educational Technology Susan Bierster, welcomed new and returning members of the committee and thanked them for volunteering for this committee work. She emphasized that members will find this committee's activities some of the most important work they will do at the College.

# I. Approval of Minutes of April 28, 2016, May 17, 2016 Evote

**Discussion:** None

**Data sources consulted: Minutes** 

**Action:** Motion to Approve: S. Bierster; 2<sup>nd</sup>: Z. Espinoza **APPROVED** 

#### **II.** For Your Information

#### (Separate FYI agenda for September 22, 2016)

G. Spain reviewed the FYI agenda which included CCE and Avocational course activity conducted over the summer, Five Year Rule Courses, SCNS (Statewide Course Numbering System) actions, VPAA/DBOT actions related to reactivation of a Music course, further compliance with the Veterans Administration involving the Aeronautical Science program, approval of new/revised/deleted programs and the Addendum for 2016-2017 Catalog, as well as housekeeping and 2015-2016 minutes corrections. There was no discussion on this information.

#### **Curriculum Actions Effective January 2017 (20172)**

To facilitate curriculum processing for actions requested for spring term effective January 2017 (20172), it is required that the course action department put these courses on hold for spring registration (starts October 4th) until notification is given from Academic Services that the course changes have been processed. If students are allowed to register for these courses, the curriculum change approved cannot be processed for Spring Term. New courses effective January 2017 will not be available until after the start of early registration.

Current Information Management - Security & Network Assurance (BAS) T803	Proposed Information Management - Security & Network Assurance (BAS) T803			
Program Learning Outcome #1				
Describe the components in the network infrastructure	Describe the components of a given network infrastructure and how they connect to the systems architecture to deliver value to the organization. Demonstrate an understanding of vendor management in the development of practical solutions to security management challenges.			
Program Learning Outcome #2				
Use and configure network applications to secure the private and DMZ networks	Determine and use the appropriate network application tools to plan, proactively monitor, and secure information in systems and on networks.			
Program Learning Outcome #3				
Demonstrate comprehensive understanding for information and network security; planning, risk management, security technologies, and personnel	Demonstrate comprehensive understanding of information and network security processes such as; planning, risk management, security technologies, and optimizing organizational processes to eliminate unauthorized intrusions by individuals and groups.			

<u>Justification</u>: ISM3115 - The current Project Management Curriculum does not have a course that deals with Stakeholder and Communications management across various Project Management methodologies. The recent curriculum review of prosepctive employers also confirmed the need for this skill set amoung our PBSC BAS IM graduates. CNT4406. CNT4408, and ISM4324 - Students need the foundational skills developed in the ISM4220, ISM4320, ISM3113, ISM3212, ISM3314, COP3530 prerequiste courses to be successful in these courses. ISM4312, ISM4331, ISM4332, MAN4520, and MAN4584 - Students need one specific course prereq in addition to a foundation in project management to successfully complete these courses. ISM4323, ISM4331, and ISM4881 - Students need the foundational skills from Information System Security, IT Integration or Security Management to be successful in these courses. T801, T803 - This program change will allow students to have the option to participate in an Internship as part of the Degree program. The change is in response to marketplace input that students need to have more hands on experience. T803 also changed the three program learning outcomes. T804 - The purpose of this program change is to replace ISM3212 with a new course in Stakeholder and Communications Management as a required course.

**Discussion:** Dr. Gladney, Associate Dean of Bachelor's Degree Programs reviewed the justification for the changes made to the Bachelor of Applied Science in Information Management based on a recent program review. There were no questions.

**Data sources consulted: Curriculum Support Documents** 

**Action**: Motion to Approve: S. Bierster; 2<sup>nd</sup>: Z. Espinoza **APPROVED** 

#### B. AA Courses

#### **Speech**

Revised Courses

Effective January 2017 (20172)

SPC1017 Fundamentals of Speech Communication (Update Course Learning Outcomes)

3

<u>Justification</u>: The Speech Cluster has determined that revising the learning outcomes to update the language so it more accurately captures what is expected of the students and will enable more accurate assessment.

**Discussion:** Stephen Frishman shared that the revision in the course learning outcomes was done to better capture what is expected of the students and will enable more accurate assessment. Karen Pain, Assessment Director confirmed.

#### **Data sources consulted: Curriculum Support Documents**

**Action**: Motion to Approve: Z. Espinoza; 2<sup>nd</sup>: C. Alexandre

APPROVED

Required Courses		Clock Hours: 40	Required Courses		Clock Hours: 60	
RMI0092	Life, Health and Variable Annuities	40	RMI0092	Life, Health and Variable Annuities	60	
Total Program Clock Hours: 40			Total Program Clock Hours: 60			

#### Justification:

Florida Department of Financial Services changed the required hours from 40 clock hours to 60 clock hours.

**Discussion:** Jenny Posada shared that this is a compliance issue due to the fact that the State of Florida Department of Financial Services has changed the clock hours from 40 to 60. A committee member asked what the increased contact hours represented in learning outcomes. Ms. Posada and K. Gamble indicated that the additional learning outcomes were included in the updated course outline shared with the Committee for review.

Total Program Credits: 27			Total Prog	ram Credits: 27			

<u>Justification</u>: 1) As per college policy, MTB1103 is being removed from the CCC because it is not part of the 2 year AS Accounting Technology degree (AS2050). It has been replaced with CGS1513. 2) MAR, MKA and PLA are being removed from the list of electives because the 2 year AS degree does not include any courses with those prefixes. SLS is being added because the degree was recently revised to include SLS courses.

**Discussion:** Robin D'Agati explained that this curriculum action was to correct the CCC courses so that they reflect courses included in the AS degree per college policy as well as add CGS1513 Electronic Spreadsheets which will help students be successful in this certificate.

# **Data sources consulted: Curriculum Support Documents**

**Action**: Motion to Approve: C. Alexandre; 2<sup>nd</sup>: S. Bierster **APPROVED** 

#### 3. Paralegal ATC FA

#### **Effective August 2017 (20181)**

Proposed Par	ralegal ATC (4XXX) CIP 0722030266		
Required Cor	urses	Credits: 21	Pre/Coreqs
ENC1101	College Composition 1	3	NA
PLA1003	Introduction to Paralegalism	3	PC PLA2209
PLA2229	Court System: Procedures and Pleadings 2	3	P-ENC1101, PC-PLA1003
PLA1104	Legal Writing and Research 1	3	P-PLA1104
PLA2114	Legal Writing and Research 2	3	PC-PLA1003
PLA2209	Court System: Procedures and Pleadings 1	3	NA
BUL2241	Business Law 1		
OR			NA
BUL2242	Business Law 2	3	
	TOTAL CREDITS	21	

<u>Justification</u>: In order to take the National Association of Legal Assistants (NALA) Certified Paralegal (CP) examination, test takers must meet certain criteria. In addition to earning an associate's degree (A.S.) in Paralegal, one may also be eligible to take the NALA exam based on holding a bachelor's degree (in any subject) and at least 15 credit hours in substantive paralegal courses. A considerable number of students who hold bachelor's degrees regularly take paralegal courses as non-degree seeking students solely for the purpose of achieving eligibility to take the NALA CP examination. The creation of an advanced technical certificate in Paralegal for these non-A.S. degree seeking students would allow for a new program to be marketed to an underserved section of the community while simultaneously helping the college capture a greater number of program "completers" that have historically been unaccounted for at Palm Beach State College.

**Discussion:** Cary High stated that the creation of this advanced technical certificate in Paralegal for non-A.S. degree seeking students would allow for a new program to be marketed to an underserved section of the community seeking the national certification as a paralegal that is currently under-reported as completers for the College. The certificate complies with the FLDOE requirement for this ATC as well as certification criteria of the American Bar Association.

#### **Data sources consulted: Curriculum Support Documents**

**Action**: Motion to Approve: Z. Espinoza; 2<sup>nd</sup>: R. McFarlane McCalla **APPROVED**

<u>Justification</u>: In reviewing the ECPC and FCCPC Area of Study and Catalog Webpages, it was discovered that there was an admissions requirement omitted from the list of prerequisites to be accepted into the program, the 5-Hour Emergent Literacy course. In addition the wording on these pages needed to be consistent with the wording used on the individual program webpages, the information sessions and the program packets. The state recently made changes to the format in which the Age-Specific Developmentally Appropriate Practices (DAP) courses are offered. This format needed to be changes in the Area of Study and Catalog pages.

Discussion: Susy Martinez-White explained that this action was to make the catalog listing for these programs consistent

with what is required by the state and what is being shared with students through advisement. In addition, an overlooked admission requirement was corrected.

**(Or higher. Students planning to transfer to a university should see an advisor.)					

<u>Justification</u>: This is a State revision to AS degree programs. The Early Childhood Education AS degree program will be reduced from 63 credits to 60 credits. The CCCs will not be affected. For course sequence, we will eliminate Year Three, Term Three (summer) in the sequence. Students will complete the program one term earlier. The State has also made a change to the CIP code. The new CIP is 1413121004.

**Discussion:** Jennifer Johnson presented in place of Susan Caldwell and explained that this a State mandated action due to the reductions of credits from 63 to 60.

<u>Justification</u>: CTS2XXX - This course prepares students for Cisco Certified Entry Networking Technician (CCENT) Exam using a variety of question formats including simulated lab using Cisco Packet Tracer simulation software. Revised CCCs - These program revisions are required because the total number of credits did not match the state frameworks assigned.

**Discussion:** Elizabeth Horvath explained that the new one credit course will prepare students for the CCENT Exam using various formats. The course does not need to be specifically added to the CIS AS degrees due to the structure of the elective course listing (prefix listings only.) When a committee member asked if the state often changes total credits of a certificate program, it was explained that these changes were due to a misinterpretation of a 2012 DOE memo to mean that Colleges could offer CCCs for less than the stated credit total. This is only allowed if there is documented support of the local industry hiring CCC completers on file with the DOE. The cluster agreed that correcting the credit totals of the CCCs that were not in compliance was the best action to take to resolve this issue.

CNT2404	Network Attacks and Introduction to TCP/IP Security	3			
CNT2405 Intrusion Detection Systems, Countermeasures and PKI 3					
Total Program Credits: 12					

<u>Justification</u>: 5 Year Rule Courses - BOT Policy 6Hx-18-2.08 requires a review of courses that have not had enrollment in five years. This policy requires that these courses be inactivated at Palm Beach State and inactivated on the SCNS list of courses for Palm Beach State. The following courses fall under this criteria. Those courses included in programs offered at Palm Beach State must also have related curriculum actions to remove the courses from those programs. All cluster members approved of removing the Computer Information Security (4139) ATC and deactivating the courses, since there is a new Information Security CCC which covers the same competencies.

**Discussion**: Elizabeth Horvath explained the reason for the deletion of these courses and the ATC program was because there has been no student enrollment in the ATC in 5 years. Most students go into the Bachelors of Applied Science in Information Management rather than the ATC. The question was asked by the committee if there was a downside to this action. There will be no downside to this action since the cluster determined that the competencies of this program were included in a recently developed Information Security CCC.

Total Program Credits: 75		Total Progr	am Credits: 75		

<u>Justification</u>: IND2307C - Last curriculum action allocated one credit to IND2307C. After further curriculum review, it was determined that the original 3 credit hours (2 lab / 2 lecture) are sufficient to fulfill the course learning outcomes. IND2460C - This course learning outcomes include the use of computer drafting software to create and modify construction drawings. Allocating an additional credit will provide additional contact hours necessary to introduce students to the practice of communicating design decisions and intended construction quality to other building professionals through working drawing including schedules and specifications appropriate to project size and scope.

**Discussion:** Zenaida Espinosa reviewed the justifications for the requested course changes. Zenaida stated that she planned the effective date for these changes as January 2017 (20172) rather than May 2017 (20173). This has been corrected but as with all actions for Spring term, she will need to put these course changes on hold for Spring registration until the changes are made. This is needed so that all students enrolling meet the updated criteria and fees for the courses changed.

<u>Justification</u>: The Biotechnology Program is requesting that the Biotech degree audit not require MAC1105 alone as the Area III Mathematic requirement but allow any MAC prefix course in the Area III listing. It would save having to do individual course substitutions. The degree audit would then reflect MAC\*, and any MAC number would meet the requirement. Many Biotechnology students place out of MAC1105 (College Algebra) through testing and go on to take a higher level math course(s). This curricular change would allow any of the higher level math courses above to satisfy the Biotechnology AS degree requirement for Area III.

**Discussion:** Becky Mercer shared that many Biotechnology students place out of MAC1105 (College Algebra) through testing and go on to take a higher level math course(s). This curriculum action gives that student an option to take any of the higher level math courses and satisfying the Biotechnology AS degree requirement for Area III-Mathematics without a substitution submission action by the department. A committee member asked if this was not an automatic action for any lower level Area III Math courses in a program. It was confirmed that only programs that set up degree audit programming this way through curriculum action do not have to go through the substitution process for higher math.

<u>Justification</u>: 5 Year Rule Courses - BOT Policy 6Hx-18-2.08 requires a review of courses that have not had enrollment in five years. This policy requires that these courses be inactivated at Palm Beach State and inactivated on the SCNS list of courses for Palm Beach State. The following courses fall under this criteria. Those courses included in programs offered at Palm Beach State must also have related curriculum actions to remove the courses from those programs. This apprenticeship program has relocated to another county and is under another LEA (local education agency) and courses are Five Year Rule courses. The majority of the program courses are not being deleted because they makeup the Electrical Apprentice 4 Year Program.

**Discussion:** Kent Hartwig stated that these courses have had no enrollment and fall under the 5 Year Rule. The apprenticeship program has relocated to another county and is under another LEA (local education agency). It was also confirmed that the majority of the program courses are not being deleted because they makeup the Electrical Apprentice 4 Year Program which will continue to be offered.
