Student Training in Technology

Assessment Report

Assessment of Student Training in Technology for AA, AS, PSAV, ATC and ATD Programs

Academic Affairs
2015-2016

Introduction

As part of Palm Beach State College's program review process, student training in the use of technology is assessed. An assessment form is sent to program administrators and faculty which asks them to assess how technology is used in each program and where technology is embedded in the coursework.

Analysis

A review of the forms reveals that every program offered by the College has student training in the use of technology. This use is documented for both hardware and software used to achieve student learning outcomes.

Use of Results for Improvement

The compiled report will be placed on the agenda of the Executive Leadership Council, the Deans Council and Academic Program Management Council for review and comment.
