

Executive Summary

Palm Beach State College

Lower-Division Completion Tracking

For the performance funding lower-division completion component, the Florida Department of Education uses a cohort of full-time, first-time-in-college students, including formerly dual-enrolled students. For this report, internal and National Student Clearinghouse data were used to determine the outcomes of Fall 2009 through Fall 2012 cohorts at the end of the 150% and 200% completion windows.

It should be noted that the completion rates calculated in this report do not match those produced by the FDOE due to differences in methodology. However, the purpose of this report is not to match the State's output, but rather to categorize students and identify potential opportunities for improvement.

The cohort

- Students in the completion cohort are most likely to be in the associate in arts program. However, this percentage decreased from 73% in Fall 2009 to 63% in Fall 2012.
- After analysis, the largest categories of students are those who complete a program and those who drop out or fail out.

Graduates/completers

- The 150% completion rates, when transfers are removed, have been trending upwards while 200% completion rates have been ticking slightly downwards.
- The proportion of students completing within two years (six terms) has been increasing.
- Still, about half of students in the 150% cohort and a quarter of students in the 200% cohort require the final year of the completion window to complete a program.
- On average, associate in arts graduates make up about 85-90% of completers in any given cohort. However, the cohort historically is only about 65-70% AA students.
- PSAV completers are increasing, particularly in the 150% cohort.
- The number of degree completers with more than 75 hours earned has been decreasing, indicating fewer students with large amounts of excess hours.

Transfers

Students who were found by National Student Clearinghouse to be enrolled at another college at any time during the completion window are removed from the overall completion rate.

- The number of transfers has been decreasing over the past four years.
- Students who transfer are most likely to do so in the first two years.
- The average point at which students transfer has remained relatively steady.
- On average, about 30% of degree transfers leave with more than 30 credit hours earned.
- About half of transfers have GPAs of 2.5 or higher. These students make up about 7-10% of the total cohort (200-300 students), on average.

- The top five institutions to which PBSC students transfer are Broward College, Valencia College, Florida Atlantic University, Tallahassee Community College and Santa Fe College.

Stop-out and re-enroll

For this report, a stop-out is defined as a student who leaves Palm Beach State for three or more consecutive terms without transferring or completing, then returns but has not completed a degree or certificate before the end of the tracking period.

- This is the smallest group, making up only 3-4% of the 150% cohort and 5-7% of the 200% cohort, on average.
- Most stop-outs leave in the first two terms and do not return for 4-5 terms.
- Most of students who stop out had earned less than 15 hours when they stopped.
- On average, stop-out students earned only a little more than half of the credit they attempted.
- Students stop out with an average GPA of less than 2.0.

Dropout/fail-out

For this report, a dropout is defined as a student who leaves Palm Beach State for three or more consecutive terms without transferring or completing. Students who left with only two terms remaining in the tracking period also are considered dropouts.

- Averaging about 30% of the cohort, this is the largest group of students who fail to complete a program.
- About half of dropouts/fail-out do so in the first year.
- Most dropouts/fail-outs had earned less than 30 hours when they left.
- On average, dropout and fail-out students earned only a little more than half of the credit they attempted.
- The average GPA of a dropout or fail-out student is less than 2.0, and about 35-40% are on probation, or had been suspended or dismissed due to failure to meet academic standards.
- On average, about 30% of dropouts have GPAs of 2.5 or higher. These students make up about 7-9% of the total cohort (200-250 students).

Continuously enrolled

For this report, a continuously enrolled student is defined as one who has not left Palm Beach State for three or more consecutive terms, but has not completed or transferred.

- Nearly one-quarter of PBSC students in the 150% cohort are classified as “continuously enrolled,” meaning they have not completed, transferred or stopped/dropped/failed out. This figure drops under 10% in the 200% cohort because of the extra year students have to complete or qualify for other categories.
- Continuously enrolled students in the 150% cohort have attempted 60-63 hours, on average, earning 44-47 credits. These figures are slightly higher in the 200% cohort due to the extra year.
- The average GPA of continuously enrolled students is a little above 2.5, and nearly all have a clear academic standing.
