9. Comments about the registration process:

Text Response

they were very nice and well organized and told me step by step how to apply and become a transient student !

orientation problems because of the staff signing me up for the wrong date. didnt get classes i wanted.

It takes way too long for transcripts to be evaluated!

A stress-free process.

I really have no say on anything

Registration was fast and easy,

At first when I approached registration, they were very non-chalant about the whole idea of people being there to ask questions. There was a little attitude that this was just too much for them, then after me trying to break the ice, things were more comfortable. I am the new student returning to school after 13 years, it should probably be the other way around.

the registration process was easy. the step by step process took about 20 mins.

The registration process is very good, the registration staff has a good common sense they very friendliness and courtesy.

Absolutely horrible from the registrar to the advising group. No one did their job properly causing me to return twice to get registered.

The people there seemed to not really care about people in line and took their time, did not acknowledge people or say 1 moment please etc. They seemed like they did not want to be there.

This is the worst school that I have ever dealt with. Im glad that Im only doing one semester here!!

I did the process online. the website is convenient but not well organized

It would be nice to have a first time here service because I was very lost and treated like I should know the process. By insisting on speaking with an advisor I got great help and better understanding when I explained my goals and the fact that this was my first time at this college. Testing, Career Center and Financial aid I haven't used.

9. Comments about the registration process:

Text Response

It takes way too long for transcripts to be evaluated!

A stress-free process.

At first when I approached registration, they were very non-chalant about the whole idea of people being there to ask questions. There was a little attitude that this was just too much for them, then after me trying to break the ice, things were more comfortable. I am the new student returning to school after 13 years, it should probably be the other way around.

the registration process was easy. the step by step process toke about 20 mins.
