ITEM 1. General Education Course Nominations

Discussion: The following courses were nominated by faculty clusters for inclusion in the general education program. Each course presenter had three minutes to make their case as to why the course was an appropriate addition to the general education program. This was followed by questions from the committee. Voting took place in the absence of the presenter. Only faculty on the committee were voting members; administrators on the committee were ex officio. The following recommendations will be forwarded to the Deans' Council for consideration.
