The focus this year: **NUTRIGENOMICS**, the study of the effects of diet and food constituents on DNA and gene expression.

**Nutrigenomics** has the potential to prevent, reduce, and treat chronic diseases and certain cancers¹.

Learn about:
- Common genetic variants (SNPs)
- Nutritional factors that protect the genome from damage.
- Personalized nutrition.
- How to make cheese, beer, & wine.

Light refreshments and non-alcoholic beer, wine, and cider served.

**Biotech Oktoberfest**

*Applications of Biotechnology to Food and Nutrition*

**Monday, October 31st**
12pm - 2 pm
**SC127**

**Palm Beach Gardens Campus**
3160 PGA Boulevard
