

Juliana Osorio, a 2014 graduate of Palm Beach State College's Environmental Science Technology A.S. degree program, is now pursuing her Bachelor's degree at Broward College. Broward College accepts 60 credits of PBSC's A.S. degree as a full transfer into their program, so you can begin as a junior and earn your B.S. in Environmental Science with just two more years of schooling at a considerable cost savings as compared to other local universities.

Congratulations to Juliana Osorio on your recent acceptance to Broward College, and we wish you continued success as you pursue a higher degree in the field of Environmental Science!

To learn more about transfer opportunities from PBSC's Environmental Science program to Broward College's B.S. in Environmental Science and to start your application, visit:
