NUR 1023L

Course Description

This course provides opportunities for students to integrate classroom learning, skills lab practice, and client care incorporating three types of apprenticeships—knowledge, practice, and ethical comportment. Care will be provided to selected clients across the lifespan in a variety of settings. The focus is on assessment and wellness. Special fee required.

Course Outcomes

1. Show accountability for nursing judgment and actions.
2. Demonstrate caring, compassion, and respect for all persons and human dignity.
3. Identify behaviors that are consistent with safe quality care in the promotion of a healthy work environment.
4. Demonstrate the ability to function within teams.
5. Translate knowledge into practice in order to promote quality and improve practice.
7. Incorporate evidence based practices when planning patient centered care.
8. Perform technical skills safely and accurately.
9. Document accurately in simulated EHR.
10. Demonstrate an appreciation for diversity and others’ values.
11. Identify ethical challenges and act in accordance with legal and regulatory guidelines, including HIPAA.
12. Communicate information effectively.
13. Work cooperatively with others.
14. Recognize the needs of the patient which promote and restore health, integrity, and self-determination.
