NUR 2712C

Course Description

This course is designed to assimilate the concepts for nursing practice. Through the integrated approach of classroom learning and client care in a variety of settings, the student moves from simple to complex in the synthesis of nursing concepts and skills. The emphasis is on concepts such as motivation, functional ability, tissue integrity, infection, sensory perception, clotting, psychosis, anxiety, sexuality, health care quality, care coordination, and health policy.

Course Outcomes

1. Values the importance of the role of the nurse in the holistic care of patients, families, and communities as it relates to accountability, leadership, advocacy, values and ethical conduct which impact health care delivery.
2. Evaluates safe quality care and teamwork within health care organizations which influences health care policies and delivery systems to improve the quality of health for diverse populations in the context of the community.
3. Applies knowledge from the disciplines of nursing, the sciences, arts, and humanities as the foundation for nursing judgment to improve quality of care for patients, families, and communities.
4. Value a sense of curiosity to inform learning and nursing practice.
5. Illustrate nursing judgment utilizing evidence based practice within a family and community context to promote cultural, spiritual, and ethical quality care of diverse patients.
6. Value intra-disciplinary collaboration which promotes relationship centered care in order to provide safe, quality care.
7. Assess patients’ and families’ progressive growth in complex client care situations to promote health, integrity and self-determination.
