NUR 2712C

Course Description

Using the theories of holism and goal attainment, the concepts of oxygenation, cellular integrity, regulation, perception, perception/sensory/cognition and mobility will be applied across the lifespan in the synthesis and evaluation of complex nursing situations in both high acuity care and community settings. Clinical environments will be explored with high acuity settings.

Course Outcomes

1. Complete nursing assessments and initiate the nursing process while providing holistic care to clients with complex health challenges.
2. Apply the nursing process in selected populations across the lifespan.
3. Integrate the principles of growth and development in the personal, interpersonal, and social needs for a given population of clients.
4. Apply the principles of nutrition and diet therapy upon identification of complex nutritional health challenges.
5. Integrate ethical and legal concepts in relevance to professional nursing practice and the delivery of care based on American Nurses Association (ANA) Standards of Practice.
6. Evaluate cultural diversity affecting client responses to health care and interrelationships between and among personal, interpersonal, and social systems transactions based on knowledge of cultural diversity.
7. Synthesize principles of management, leadership, and critical thinking toward client’s restoration of wellness in acute care and ambulatory setting while incorporating the theories of holism and goal attainment.
8. Integrate knowledge of commonly used pharmacology agents based on pharmacological principles and safe practice.
9. Demonstrate accountability in the administration of care using sound ethical principles.
10. Demonstrate effective communication/counseling with clients, families/significant others, and health care team members based on the principles of therapeutic communication.
11. Initiate interventions to assist clients and families/significant others to attain and maintain wellness while applying the theories of holism and goal attainment.
12. Demonstrate safe and accurate technical skills when providing care to select client populations.
13. Incorporate principles of teaching/learning to assist clients, families/significant other and groups to attain wellness based on sound educational theories.
14. Synthesize the various roles of the nurse as a member of the healthcare team while promoting interdisciplinary collaboration.
15. Demonstrate responsibility for personal/professional growth related to issues of professional nursing practice according to the standards set forth in the Nurse Practice Act (NPA) by the Florida Board of Nursing (BON).
